### ***Required Texts:***

Thomas S. Kuhn, *The Structure of Scientific Revolutions*, 3rd ed. (Chicago: University of Chicago Press, 1996).

All other readings are contained in a course packet that can be purchased at the Copy Shop in LaFortune Student Center.

***Course Requirements:*** There will be a mid-term and a final examination, each an in-class, essay examination worth 25% of your final grade. A term paper (minimum 15 pages) will be worth 40% of your final grade. The remaining 10% of your grade will be based on class participation.

***One-minute Papers:*** At the end of every class session, we will stop a minute or two early, so as to give you the opportunity to write “one-minute papers.” These will be ungraded, but required of every student at the end of every class. Normally no more than two paragraphs long, these one-minute papers must contain answers to two questions: (1) What was the most important issue addressed in today’s class? (2) What issue remains most unclear in your mind at the end of today’s class?
