

COMMODITIES READING & VIEWING LIST

Here is a selection (in alphabetical order, by author or director) of classic and recent books and films on commodities. You should choose one book or film from the list for your final paper.

If you choose your book or film early in the semester, and read or view it more than once, you will find it much easier to prepare the essay due at the end of the semester. While the library may have a copy, you should consider buying the book or film you choose to give you more time to read or view it without worrying about library availability or return policies. All these books and videos can be purchased at major bookstores or online through any of the major internet retailers.

Students reading the same book or viewing the same film, or reading different books or viewing different films on the same topic, are encouraged to work together. I will post the list of students' choices soon after the deadline (21 March).

Marcia Angell, *The Truth About the Drug Companies: How They Deceive Us and What to Do About It*

Emily Apter and William Pietz, *Fetishism as Cultural Discourse*

Jacques Attali, *Noise: The Political Economy of Music*
