Author Checklist

Authors should adhere to the following requirements

1. Submit manuscripts to the journal using the Editorial Manager website
   http://www.editorialmanager.com/ammidnat/default.aspx

2. Make sure to answer the "Additional Information" questions found on the Editorial Manager website as part of the submission steps. This step is mandatory and confirms there is no conflict of interest that could be perceived to bias your work, and the results/data/figures in the manuscript have not been published or are not under consideration for publication elsewhere. Also, initial verifying you have read the Author Instructions and Author Checklist prior to submitting an article.

3. Confirm the style and format of your entire manuscript follows the requirements of the *American Midland Naturalist* as indicated by our Editorial Conventions. The following are formatting requirements that are commonly overlooked and should be double checked:

   a. Provide a running head title. Including authors' names, this should not exceed 70 characters and should be located on the first page, top left hand side.   The 70 characters needs to include the authors names in the count but do not include the authors names with the running head. The press inserts the names during type setting.

   b. Journal titles in the Literature Cited section need to be abbreviated, using periods, by the authors. Web of Science has abbreviations for most scientific journals. Make sure a comma is used between the journal title and edition number

   c. In the Literature Cited section, the authors' names should be listed first author's last name followed by the author's initials. Additional authors should be listed with their initials first followed by their last name. Make sure authors NAMES are in SMALL CAPS.

   d. Page numbers and continuous line numbers should be indicated throughout manuscript

   e. Figure resolution should be a MINIMUM of 300 dpi. We have instructions we can send you if you need help deciding if your figure will work. For instructions e-mail the journal at ammidnat@nd.edu

   f. Figures and tables should be uploaded as separate files to the Editor Manager website during the manuscript submission step.

   g. Coordinates for study sites or field sites should be provided in the Methods section
