Critical Design Review (CDR) Schedule

November 28th (in-house presentation, Drs. Batill and Renaud)
November 30th (Industry Review Panel)

This years Critical Design Reviews will take place on two dates. On **November 28th** each group should be prepared to make their CDR presentation to an in-house reviewer (i.e., Dr. Renaud or Batill). This should be the complete and final version of the presentation and will be a graded event. The presentation must include quantitative engineering justification for the proposed concept. A demonstration, real or virtual should take place during the presentation. All group members are expected to participate in the presentation. On **November 30th** each group will make the same CDR presentation to an industrial review panel. Each presentation will be 20 minutes in length (strictly enforced) with 5 minutes for questions.
