AME40463 Class:

Now that building has started, the milling machines are going to be in use by both our class and the Aero's. This will require some planning on your part to make sure that you have time on the machines. During our scheduled class time, T and Th, we will have access to the milling machine on the right and the large milling machine. If you require the large milling machine the sign up sheet is on the table next to it. You will be able to sign up for 30 minute blocks during class. If no one has signed up for the block after yours, you may continue to use the machine. After hours, you are able to use both machines but not the large milling machine. There will be a sign up calendar for each and you can sign for time as necessary. Remember, always use a wooden backing board on the machines and be careful with the placement of your clamps. Everything you need should be in the red toolbox next to the milling machines. If you need more backing material let Edytka or Jude know and they can order that for you. Keep in mind it may take a few days for it to come in.

Be sure to check the website regularly for other important announcements.

Thanks.
