

UNIVERSITY OF NOTRE DAME  
DEPARTMENT OF AEROSPACE AND MECHANICAL ENGINEERING  
AME40463: Senior Design Project

Web site Critiques: April 4, 2008  
Prepared by: M. Giordano

**A1** – Nothing has changed. If you're interested in suggestions please see my comments from the last few weeks.

**A2** – Very nice pictures! I like the formatting and the various views that you give. A nice touch would be to add a caption and explain what a few of the models are.

**A3** – I like that you have kept updating your images, the sketches and graphs compliment the CAD models very nicely. Now on to the next step: videos! You could also include some "exploded" view CAD images to give the reader a feel for how the prototype is assembled.

**B1** – Thank you for taking my advice from last time. Meeting minutes look good, the CAD images and captions are great, and the movie is fantastic! Very nice job incorporating all of these assets into your web site. Now all you need are some photos/movies of your actual prototype and you'll be all set!

**B2** – Great improvement. The pictures and movie are fantastic and are very well organized on your site. On a more picky note, the text beside the extra images and movie are not linked, only the small graphics are...a quick fix that will save a viewer some confusion. I also like the addition of the "Documentation Summary" on the front page, it will make our job much easier!

**B3** – Great design on the front page! The large graphic at the top sets your site apart from others very nicely. The CAD models which you have included are great too! Keep up the good work – maybe some movies in the near future?

**C1** – Graphics and videos were a much needed improvement, good job including them. It also might serve your website better to include a prominent prototype depiction on your home page along with a brief problem statement.
