Students,

Before you show up to get certified for the CAM Workcells you need to go the class website under CAD-CAM Workcells and...

1. Save the Pro/E tutorial part in a working directory of your choice but make sure you can access these files online in order to import them into the computers in the B-19 Design Studio.
2. Do the the Pro/E Wildfire 3.0 CAM Tutorial. Note: On the first page of the tutorial it tells you to set the working directory to the CAM_tutorials folder. Ignore this, use whatever working directory you set up.
3. Read through the CNC Tool Operation Guidelines.

If you have questions feel free to contact Edytka Christner or Jude Miller.

~Edytka
