

Prototype Evaluation and Public Display

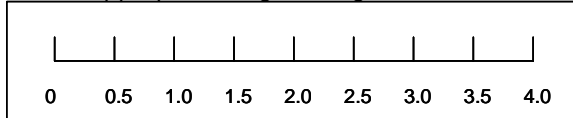

AME40463 Senior Design Project: Spring 2008

Design Group: _____

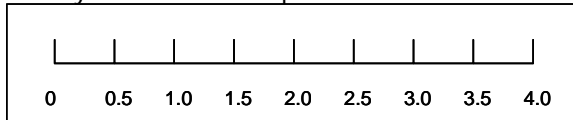

Score: _____ (32 pts Max)

Evaluator: _____

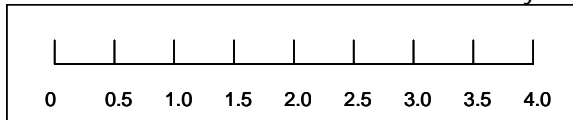

Use of appropriate engineering materials

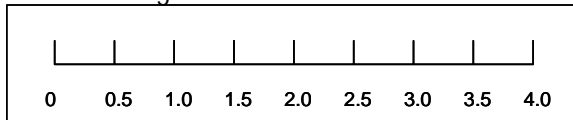

Quality of in-house component fabrication

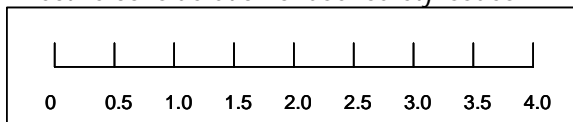

Effective use of fasteners and other assembly issues

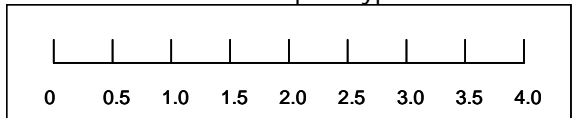

Effective integration of electronics/sensors/actuators/wires

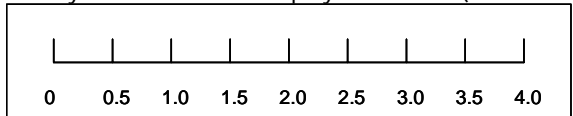

Effective consideration of user safety issues

Overall aesthetics of the prototype

Quality/effectiveness of display visual aids (in addition to prototype)

Ability of group to communicate ("sell") their concept (enthusiasm, group participation, etc.)
