

Toy Safety Concerns

Potential Hazards

- Interaction of water/electrical systems
- Leaking battery acid
- Sharp edges on exterior
- Running into other children/people
- Squirting into eyes
- Possibility of other fluids fired rather than water

Consumer Safety/Corrective Action

- Decals and stickers on toys
- Packaging warning labels
- Separate electrical/water component housings
- Exterior design for water run-off
- Additional warning manual inside packaging
- Severe warnings molded into plastic toy body
- Small parts avoided with two-piece exterior plastic mold

Environmental Impact

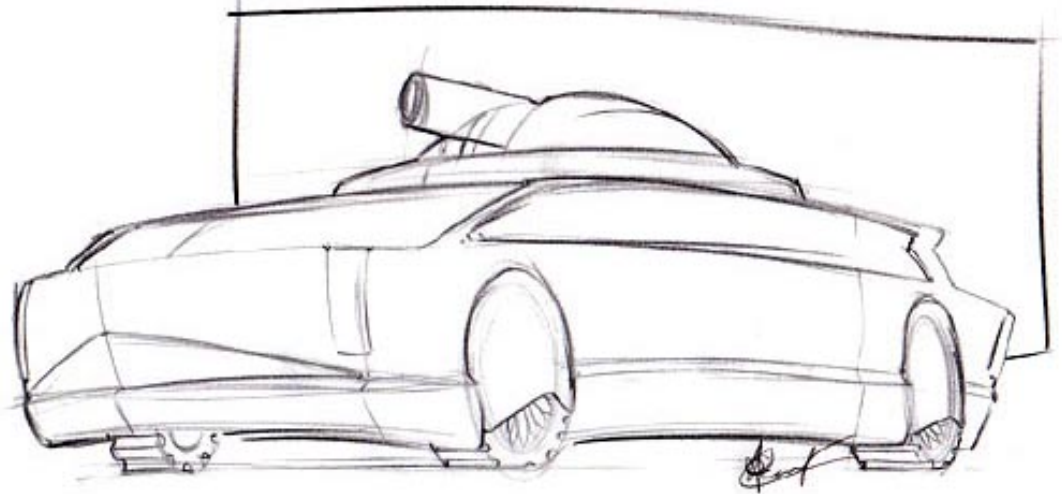

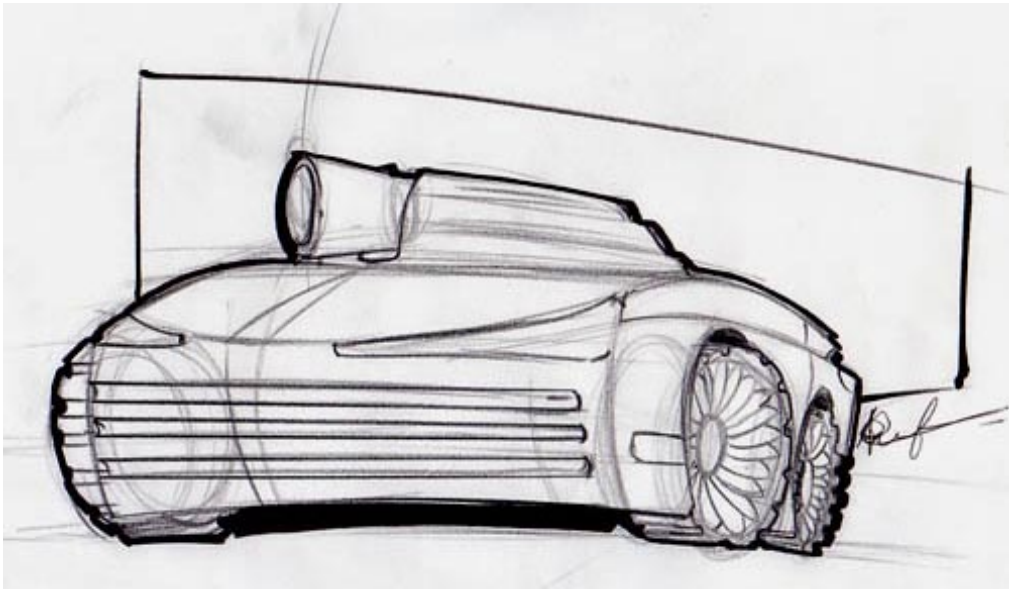

- Burying or burning of batteries
- Possibility of battery corrosion from moist environment
- Rusting of surrounding environment from water soaking
- Concern of a fluid being fired other than tap water
- Recycled material in packaging and plastic toy mold
- Proper disposal of manufacturing possible bi-products
