# Advanced Semiconductor Physics

EE698D, Fall 2004

---

## Course Evaluation

Assignments:	45%
Mid-Term Exam:	10%
Project	
Research	10%
Your Work	10%
Report	10%
Presentation	10%
Participation:	5%

## Policies

- If you audit the class, you can turn in assignments, but I will not grade them. Same with the mid-term exam. However, those who audit may, if they wish, GRADE *some* sets of assignments. I will provide the solutions. This way, even if you don't do the assignments, you will learn the material. This is STRICTLY voluntary.
- Every project group should have TWO students who are taking the course for credit. You may or may not have someone who is auditing the class in your group. His/her contributions to the project should be clearly acknowledged.
- Assignments should be taken seriously – both the problems and the deadlines. They are the best way for you to learn the material covered in the class. I encourage you to consult with your colleagues, but please turn in your own solutions. If you find the going hard, I am available for discussion. Also, that way I will get valuable feedback on my teaching, and will re-teach some concepts that might not have been clear.

## Contact
