# Wide Bandgap Device Physics

EE 87024, Fall 2011

---

## Course Evaluation

Assignments:	20%
Mid-Term Exam:	15%
Project	
Reports	35%
Presentations	25%
Participation:	5%

## Policies

- Assignments should be taken seriously – both the problems and the deadlines. They are the best way for you to learn the material covered in the class. I encourage you to consult with your colleagues, but please turn in your own solutions. If you find the going hard, I am available for discussion. Also, that way I will get valuable feedback on my teaching, and will re-teach some concepts that might not have been clear.
- If you audit the class, you can turn in assignments, but I will not grade them. Same with the mid-term exam.
- You will finalize your project topics by **Friday, Sept 16<sup>th</sup> 2011**. To keep the number of projects manageable, and to simulate collaborative work, you can work in groups, which can be decided after discussing with me.
