Literature Resources

- Society journals, CD & DVD collections
- *IEEE Trans. on Information Theory*: <http://www.cparity.com/it/demo/>
- IEEE Xplore: <http://ieeexplore.ieee.org>
- ResearchIndex: <http://www.researchindex.com>
- Google: <http://www.google.com>

Topics

- Background
 - Detection theory [1]
 - Information theory [2]
 - Wireless communication [3, 4, 5]
- “Simple” Multiuser Channels Models [6, 7, 2]
 - Multiple-Access Channel, Multiuser Detection [2, 8, 9]
 - Broadcast Channel [10, 11]
 - Interference Channel [12]
 - Two-Way Channel [13]
 - Relay Channel [14, 15, 16, 17, 18, 19, 20, 21, 22]
 - Channel State Information, Feedback [23, 24, 25]
- Multiuser Source Coding [26]
 - Slepian-Wolf Coding [27]
 - Wyner-Ziv Coding [28, 29, 30, 31, 32]
 - The CEO Problem [33, 34]

- Multiple Descriptions [35]
- Successive Refinement [36, 37]
- Wireless [5, 38]
 - Multiple Antennas [39, 40, 41, 42, 43, 44]
 - Power Control, Multiuser Diversity [45, 46]
 - Networks [47, 48, 49, 21]
- Networks [50]
 - Network Coding [51, 21]
- Connections to Singleuser Systems [52, 53]
