

FIN 40500
Group Presentation #2
Currency Crisis Case Study
Due Date: 10/31/06

The point of this project is to analyze specific instances of currency crises. There have been several instances of this over the past 10-15 years. For example:

- British Pound (1967, 1992)
- Mexico (1994)
- Turkey (1994, 2000)
- Asia (1997)
- Russia (1998)
- Brazil (1999)
- Argentina (2002)

Basically, you should be able to present a timeline outlining the important issues surrounding the crisis event. Specifically:

- What were the events leading up to the crisis (policies, events, etc.) that made the currency susceptible to an attack?
- What was the defining moment that precipitated the attack?
- What happened in the aftermath (how was the crisis resolved)?

You should be prepared to turn in a 5-10 page analysis (including charts, graphs, etc) and to give an (approximately) 10-15 minute. power-point presentation.
