

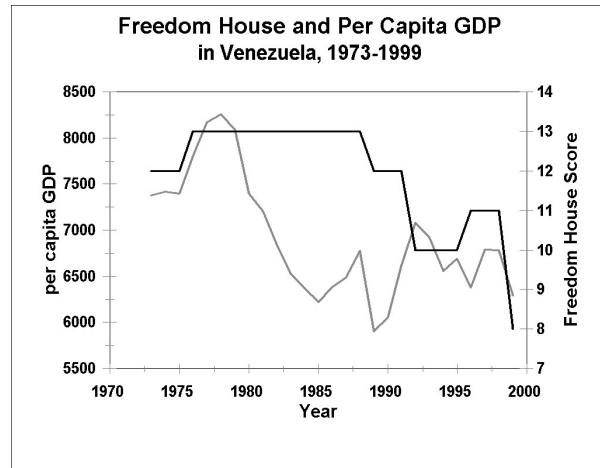

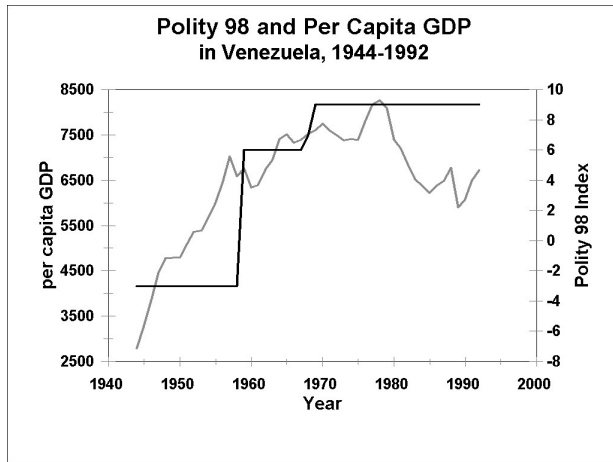

## Figure 1: Wealth and Democracy in Venezuela, 1944-1999

Figure 1a

Figure 1b

Gray lines trace per capita GDP. Black lines trace democracy indicators.

### Sources:

Polity98: <<http://k.gleditsch.soesci.gla.ac.uk/polity.html>>

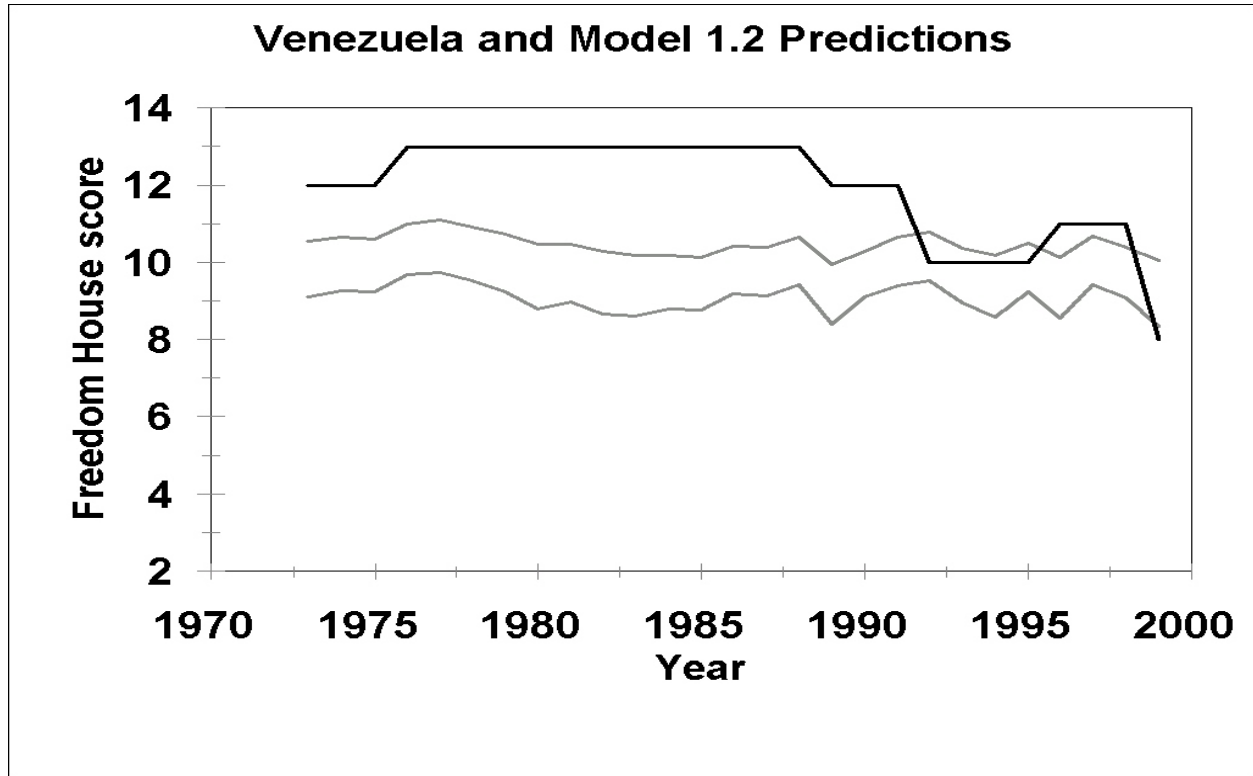

Freedom House score: calculated from Political Rights and Civil Liberties indexes available at <<http://www.freedomhouse.org/>>

Real per capita GDP 1944-1992: calculated from Maddison (1995), table D-1d; adjusted to chain smoothly with Penn World Tables 5.6 data.

Per capita GDP 1973-1999: Penn World Tables 5.6.

---

Figure 2

The black line traces actual Freedom House scores for Venezuela and the gray lines trace the 95 percent confidence intervals for the predictions of the model referenced in the figure title. Confidence intervals for predictions were generated by CLARIFY software: Tomz, Wittenberg, and King (1999, 2001 revision). This method also applies to figures 3 and 4.
