

Public address announcement

Faculty Highlight: Panos Antsaklis (PA-nos ant-sack-LEASE)

If you would, please draw your attention to the Notre Dame sideline.

During each home football game, the University highlights a member of its outstanding faculty, today recognizing Panos Antsaklis (PA-nos ant-sack-LEASE), H. Clifford and Evelyn A. Brosey Professor of Electrical Engineering. Professor Antsaklis is being presented with a commemorative football by the Provost of the University, Dr. Tom Burish (BURR-ish).

An international authority in feedback control systems and automation, Professor Antsaklis is currently the Editor-in-Chief of the top journal in his field and he is playing a key role in a five-year, multi-million dollar research project funded by the National Science Foundation. This research focuses on cyber-physical systems, which are crucial to the functioning of technologies that are used in applications from automatic pilots in airplanes, to stability controls in automobiles and to health care monitoring.

For more about Professor Antsaklis, turn to the “Faculty Highlights” section of today’s program.

Please give a warm Notre Dame salute to Professor Panos Antsaklis.
