## AME 40453 - Tech Memo Score Sheet

C6 - Coupled Water Tanks

NDID\#: $\qquad$
For more details on any of the items below, please refer to the lab handout.
Please include a horizontal line denoting the set-point height for the relevant plots listed below.

| Item and Description | Points Awarded | Possible Points |
| :---: | :---: | :---: |
| Technical writing - Using the correct format, address all questions from the lab handout, and include equations from the pre-lab. |  | 5 |
| Part I-A table containing the system parameters: tank area $A_{T}\left[\mathrm{in}^{2}\right]$, time constant $\tau[\mathrm{s}]$, and calculated LQR coefficients $\boldsymbol{k}_{p 1}$ and $\boldsymbol{k}_{p 2}\left[\mathrm{in}^{2} / \mathrm{s}\right]$. |  | 5 |
| Part I - A plot of the water heights vs. time for the case where $h_{1 s}=h_{2 s}$. |  | 5 |
| Part I - A plot of the water heights vs. time for the case where $h_{1 s} \neq h_{2 s}$. |  | 5 |
| Part II - A table containing the system parameters: tank area $A_{T}\left[\mathrm{in}^{2}\right]$, time constants $\tau_{1}$ and $\tau_{2}[\mathrm{~s}]$, and calculated LQR coefficients $\boldsymbol{k}_{11}, \boldsymbol{k}_{12}, \boldsymbol{k}_{22}$, and $\boldsymbol{k}_{21}$ $\left[\mathrm{in}^{2} / \mathrm{s}\right]$. |  | 5 |
| Part II - A plot of the water height vs. time for the case where $h_{1 s}>h_{2 s}$. |  | 5 |
| TOTAL |  | 30 |
