Mendelian Traits Worksheet

Please collect data for at least 5 family members (blood relations). If you can't get data for you specifically, pick 5 folks from someone else's family. Be sure to write the person's relation to you in the slot above the data list, we will be creating pedigrees from this information next week. The more closely related the better, the more folks in direct line with each other , the better. Feel free to collect more information than required. Use a simple Y/N for each trait, unless a color or number is required. All traits can be found at the website below.

Website to give family members: www.nd.edu/~sheridan/Hdtraits.html

Traits	YOU	1	2	3	4	5	6	7	8	9	10
